

10

A schematic diagram of a 1D lattice chain. The chain consists of a series of sites (represented by circles) connected by horizontal bonds. A vertical dashed line indicates a cut in the chain. To the right of the cut, a single site is labeled '1'. Below the chain, a horizontal line is labeled 'x'.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group and an experimental group. The control group received a standard training program, while the experimental group received a training program with a focus on the specific skills required for the task. The results of the training program were compared between the two groups.
